PILOT AND FEASIBILITY AWARD PROGRAM REQUEST FOR APPLICATIONS

LETTER OF INTENT DUE: Friday, October 17, 2025 at 5:00 PM FULL APPLICATION DUE: Friday, December 12, 2025 at 5:00 PM

The Harvard Digestive Disease Center (HDDC) will be accepting applications for new pilot and feasibility projects for the upcoming funding period <u>July 1, 2026 – June 30, 2028</u>. Applications from those with faculty appointments (at the level of Instructor or above) and current postdoctoral fellows will be considered separately.

- For Faculty applications, the maximum request is \$45,000 direct costs awarded over two years with an approved progress report at the end of year 1
- For Postdoctoral Fellows, the maximum request is \$35,000 direct costs awarded over two years with an approved progress report at the end of year 1

A Letter of Intent is required. Please use the <u>HDDC LOI Form</u> and submit along with your updated <u>NIH Biosketch</u> to Farah Kools at <u>Farah.Kools@childrens.harvard.edu</u>. Eligible applicants and projects will hear if they are invited to submit a full application by **Friday, October 24, 2025**.

SCIENTIFIC SCOPE

The Harvard Digestive Disease Center is focused on the study of epithelial cell function and mucosal biology including inflammation and host defense of the gastrointestinal tract. The Center's major areas of emphasis include inflammatory bowel disease, gut microbiology, and cell and developmental biology of the intestine, liver, and pancreas. Pilot and Feasibility projects must relate to the scientific missions of the HDDC and NIDDK. Eligible projects may be in areas such as:

- Cell and molecular biology that relate to epithelial structure and function in the alimentary tract, liver, and pancreas
- Epithelial-microbe interactions and pathogenesis of enteric infectious diseases
- Host defense in the GI tract, mucosal immunity, and vaccine development
- Epithelial cell growth and differentiation, and stem cell biology
- Smooth muscle motility and biology of the enteric nervous system

Applications that are better aligned with another NIH institute or center, e.g., GI and liver cancer, are not eligible per NIDDK policy.

ELIGIBILITY

Applicants must be either:

- Faculty (Instructor or higher) at a Harvard-associated institution when funding commences
- A current postdoctoral research fellow at a Harvard-associated institution

For Faculty that **have not** previously held R-level support, applications should describe how P&F funding will lead to preliminary data to support NIH grant applications.

Faculty that have previously held R-level support are eligible if:

- They are at-risk of having no independent R01 or R01-equivalent grant support if they do not secure a substantial grant award in the near future, or
- They have worked in other areas and need support to develop a new research program related to digestive disease.

Postdoctoral research fellows must have two years of postgraduate research (not necessarily in the current lab), and both the preliminary data and proposed studies must be the applicant's work.

Harvard Digestive Diseases Center

For all applicants:

- P&F projects cannot overlap with ongoing funded projects
- HDDC core facility use must be proposed
- An individual can be funded only once in every five-year cycle
- Funding for the second year is contingent on review of a year 1 progress report

FINANCIAL

Funds may be used for the following:

- Technical support
- Research supplies

Non-allowable expenses:

- Salaries (Investigator, Post-Doctoral)
- Travel

NIH format budget is limited to research supplies and technical support. Salaries (investigator, post-doctoral) and travel are not allowable. Equipment is funded only in very rare instances where it is vital to the particular project, unique, and not available in HDDC core facilities. Equipment requests require approval by the Harvard Digestive Disease Center Executive Committee.

- Budgets for Faculty cannot exceed \$45,000 (\$25,000 in year 1 and \$20,000 in year 2)
- Budgets for Fellows cannot exceed \$35,000 (\$20,000 in year 1 and \$15,000 in year 2)
- Indirect costs (IDC) are set at 10%

APPLICATIONS MUST INCLUDE

- 1. SF-424 face pages with institutional signatures (attached)
- 2. Summary (scientific abstract, 30-line limit) that includes (in bullet form):
 - Brief, simplified description of the project
 - Hypothesis
 - 1 sentence description of each aim
 - 1-3 sentences identifying the conceptual and/or technical innovation
 - 1-3 sentences delineating relationship of proposal to the Center's theme and goals
 - 1-3 sentences on how the project will benefit from Center core facilities
 - 1-3 sentences on how the project will benefit from specific collaborations with Center members (if relevant)
 - 1-3 sentences on plans for follow-up upon the successful completion of the project
- 3. Lay narrative (5-line limit)
- 4. NIH style research plan (3-page limit)
- 5. NIH format vertebrate animals section (if relevant)
- 6. NIH format biosketch, other support form, budget page 4 and 5 (attached), and budget justification
- 7. NIH format data management plan (if relevant)
- For established **GI** investigators, explain situation with respect to risk of having no independent R01 or R01-equivalent grant support in the near (within 1 year) future (1/2-page limit)
- For established investigators with no previous work in digestive diseases, explain how this project relates to previous work and describe how it will support development of a long-term GI-related project (1/2-page limit)
- For **Fellows**, include a brief note from the lab PI (mentor) confirming that the project described belongs to the fellow and that the fellow will be free to continue the project as a foundation for developing an independent research program (1/2-page limit)
